EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clark Puntigam on 12/20/04.

The application has been amended as follows:

Claim 8, line 18, delete "following" and replace with ---that automatically follows---

Claim 13, line 14, after "means" add ---for---

Claim 13, line 14, delete "without sonic" and replace with --- with non-sonic---

The following is an examiner's statement of reasons for allowance:

Claim 8 includes the limitation that there is a manual selection for selecting one additive container and means for moving the additive in said one container by manual action through the additive outlet. There is additionally an automatic selection means for automatically selecting at least one additional additive container automatically following the selection of the one additive container by manual selection.

Claim 13 includes a driving means for generating sonic frequency vibrations during use of one additive and during use of another additive using non-sonic frequency vibrations.

Claim 17 includes the limitation that the toothbrush system comprises an integrated container refill and battery charging base apparatus, including a refill pump unit, wherein the base is configured to refill at least one of the at least two additive containers.

The prior art references of Viltro, Dixon and Cannarella fail to teach an automatic selection means after the manual selection means. The references also fail to teach that the one additive is used with sonic vibrations and that another additive is used with non-sonic vibrations. Additionally, the prior art also fails to teach a refill charging base for the toothbrush. Therefore, the references fail to teach all the essential elements of the claimed invention nor would it have been obvious to combine references to achieve the claimed invention. For the above reasons the application is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shay L Balsis whose telephone number is 571-272-1268. The examiner can normally be reached on 7:30-5:00 M-Th, alternating F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on 571-272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
